

10 Excel Skills To Earn a Side Income

Skill up with our Excel courses: <https://bit.ly/moth-courses>

1. Report Generation for Small Businesses

Generate monthly/quarterly reports based on client data.

What you need to know: SUMIFS, COUNTIFS, PivotTables, and Charts.

Example gig: Create a monthly sales performance report for a local shop.

2. Data Cleaning Services

Transform messy datasets into clean, usable data.

What you need to know: Power Query and Text Functions.

Example gig: Clean and organize a database of 10,000 customer records.

3. Custom Excel Templates

Design templates for common tasks (budgets, invoices, planners).

What you need to know: Formulas, formatting, and data validation.

Example gig: Create a budget template for freelancers to manage their expenses.

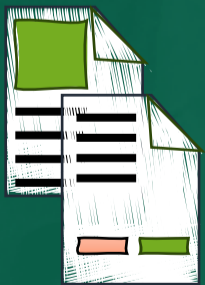

4. Spreadsheet Automation

Automate repetitive tasks to save businesses time.

What you need to know: VBA and Power Query.

Example gig: Automate a weekly report that pulls data and formats it automatically.

5. Custom Invoicing Systems

Design automated invoicing tools in Excel.

What you need to know: Data Validation, Conditional Formatting, and formulas.

Example gig: Create an invoicing system that auto-generates invoice numbers and totals.

6. Freelance Data Analysis

Analyze data, spot trends and insights, and create reports for clients

What you need to know: PivotTables, Charts, and Power Query.

Example gig: Create a monthly sales report that updates itself.

7. Dashboard Creation

Build interactive dashboards that make data easy to understand.

What you need to know: Charts, Slicers, PivotTables, and Conditional Formatting.

Example gig: Create a dynamic dashboard to track social media performance

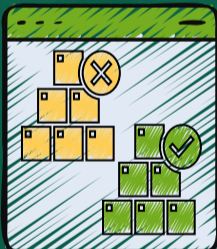

8. Financial Modeling

Build models to simulate and forecast financial outcomes.

What you need to know: Functions like NPV, IRR, and FORECAST.

Example gig: Develop a financial forecast for a startup's business plan.

9. Inventory Management

Create Excel-based systems to track inventory.

What you need to know: Lookup functions, Tables, and Charts.

Example gig: Design a spreadsheet to track inventory levels for an online store.

10. Online Excel Tutoring

Teach Excel skills to students and professionals.

What you need to know: Strong grasp of Excel fundamentals and advanced tools.

Example gig: Tutor professionals who want to learn Excel for data analysis.
